

SHOOTING AND CONSERVATION

A shooting & conservation service meeting the growing needs of farmers and estate owners with practical advice and support.

OUR SERVICE

You can maximise the potential of any size or type of shoot – from an informal family ‘walk round’ to a large commercial venture. We are helping our clients get better sport, save costs, use their countryside stewardship agreement more proactively and control deer: whilst ensuring they comply with the law and current best practice.

WHY BROWN&CO?

We give advice and support on all aspects of shooting & conservation, from the vital basics of the placement of cover crops and organising contractors manage them, through to more complex issues such as integrating environmental schemes with sporting objectives and benchmarking your costs. You can ask us on advice for whatever you may require but our service can include:

- Integrating environmental schemes with sporting objectives - we currently advise on over 40,000 hectares of ELS, HLS and new CSS agreements. It is important to ensure full compliance with the schemes whilst also maximising the sporting potential

- Estate and shoot mapping; digital plans to show locations of drives, cover strips, best gun positioning and health & safety hazards
- Deer Management advice, including sourcing grant funding and preparing management plans
- Legal compliance and Health & Safety including transport of guns and beaters, briefing of guns and risk analysis

HOW YOU BENEFIT

Draw upon our experience in providing detailed financial information to some of the leading shoots in East Anglia. Let us help you develop an understanding of profitability taking into account all tangible costs. We believe that our advice will give you a more efficient shoot, maximising revenue, whilst minimising costs and, importantly, ensure you enjoy better sport.
